The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.			
1. This communication is responsive to <u>Amendment filed 11/26/03</u> .			
2. The allowed claim(s) is/are 1-4,6-12 and 20.			
3. The drawings filed on 12 February 2002 are accepted by the Examiner.			
4.

DETAILED ACTION

Applicant's amendment filed 11/26/2003 has been entered.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Cancel claims 13-19.

The claims are cancelled because they are drawn to a non-elected invention.

The following is an examiner's statement of reasons for allowance:

All independent claims are now amended to recite "nanotube loading of less than about 0.1 wt %" and the ultrafast all-optical switch being "devoid of any additional electric components."

As discussed in the previous office action, an optical switching device comprising carbon nanotubes is known in the art. However, such devices are electro-optic switches, which require electrical connections to function. Although all-optical switches that do not require any electrical component are known in the art such devices do not use carbon nanotubes (see Lee et al, "Subpicosecond switching in a current injected GaAs/AlGaAs multiple-quantum-well nonlinear directional coupler" made of record in this application). Also, none of the prior art

Page 3 Application/Control Number: 10/074,937

Art Unit: 2874

fairly teaches or suggests a nonlinear optical material comprising carbon nanotubes and polymer composite forming an all-optical switch devoid of any electrical component as recited in the claims in the instant application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sung H. Pak whose telephone number is (571) 272-2353. The examiner can normally be reached on Monday - Thursday: 6:30am - 5:00pm.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
